Krishna - As I explained during our phone conversation, my office had the lead for NEPA/309 Review of the Forest Service's EIS; Wetlands Section has the lead for working with the Corps of Engineers on review of the CWA section 404 permit application (Corps has not yet made a permitting decision) and I think the air permit was issued by ADEQ. Colleen was our contact whenever air issues came up, and I don't know if anyone in Air Division is currently working on anything related to Rosemont. I assume Gerardo would know. Citizen Name / Ex. 6 should probably be referred to someone at ADEQ for info about the air permit.

-Kathy

Thanks for the call back, Kathy.

It seemed from the message that the caller was asking air permitting related questions. Are we working on any air permits related to Rosemont Copper?

If not, I would like to hand this off to someone who has actually worked on it so they can properly assess the callers interests and get his questions answered.

Is there not a project lead for this from EPA?

Hi Kathy,

I work for the air office in Tucson, AZ. I received a call late yesterday asking about EPA's views on the Rosemont Copper Mine.

Would you or someone that you know be the contact to answer some questions the caller had. If not would you please direct me to the right contact?

The caller's name is:

**Citizen Name / Ex. 6**

Thanks,

Krishna
